

Modernising your  
technology platform  
with business  
applications in the  
**Cloud.**

Tres Tria Limited | Cloud SaaS

## Security and Less risk with more continuity

Storing your data in the cloud means that it is managed within a data centre and maintained by professionals. We are more than prepared to take the responsibility that comes with managing important data and ensuring that appropriate measures are in place to prevent any data breaches. Because all of your business documents are stored in the cloud, you won't have to worry about external risks with your on-site server.

## Reduce the costs / Upgrade worries

It's expensive to invest in software licences and hardware such as servers, especially when it's upfront. Moving to the cloud dramatically reduces the cost of ownership with monthly payment options available, meaning that you can save on maintenance and upgrade costs. In regards to software updates, all of the updates will be managed by us, and any changes that have been made will remain, working in tandem with the new technology.

## Collaboration and engagement

Simultaneously access and work on documents, increasing collaboration and improving efficiency. If you host your software in the cloud, as long as you have the ability to access an internet connection, you can get to your data whenever and wherever you need it. This means that you can have the information you need, at the time you need it, right at your fingertips. Enhancing productivity and control of information.

## Scalability and or flexibility

Microsoft Dynamics NAV provides you with the scalability to enhance your solution by adding different functions/modules and has the flexibility to allow you to increase or decrease the number of user licenses required. You can avoid unnecessary expenditure on unused licences by adopting Microsoft Dynamics NAV SaaS (Software as a Service) allowing you to pay per month, per user.

# What we do and how we do it

We at Tres Tria Limited, sell, implement and support [Microsoft Dynamics NAV](#). We will meet with you to discuss your requirements, schedule a personalised demonstration and then create a price quote based upon your industry and business needs.

Start with what you need today and easily extend services as your needs evolve in the Microsoft Cloud, on your servers or hosted by us. Regardless of your requirements, choice of deployment, or desired payment terms (up-front purchase or a monthly subscription) we will have you up and running quickly, with less disruption to your business.

Live chat with one of our consultants, or contact us directly where we can provide you with more information about buying and deploying.

## Proud Microsoft Partners

Our aim is to rank highly when it comes to customer satisfaction, and we're doing a pretty good job of it. This is why the majority of our customers moved to us from other UK re-sellers. Located in the UK on the borders of Kent, Surrey and London, we at Tres Tria have built a close, dynamic and creative workforce made up of focused IT professionals, whose passion for product innovation and development is incomparable with any other UK Microsoft Partner. We specialise in Microsoft Dynamics NAV (formerly known as Navision) and our aims will always focus of supporting your business ambitions and growth.
